

To download Visual Studio Code, proceed to:

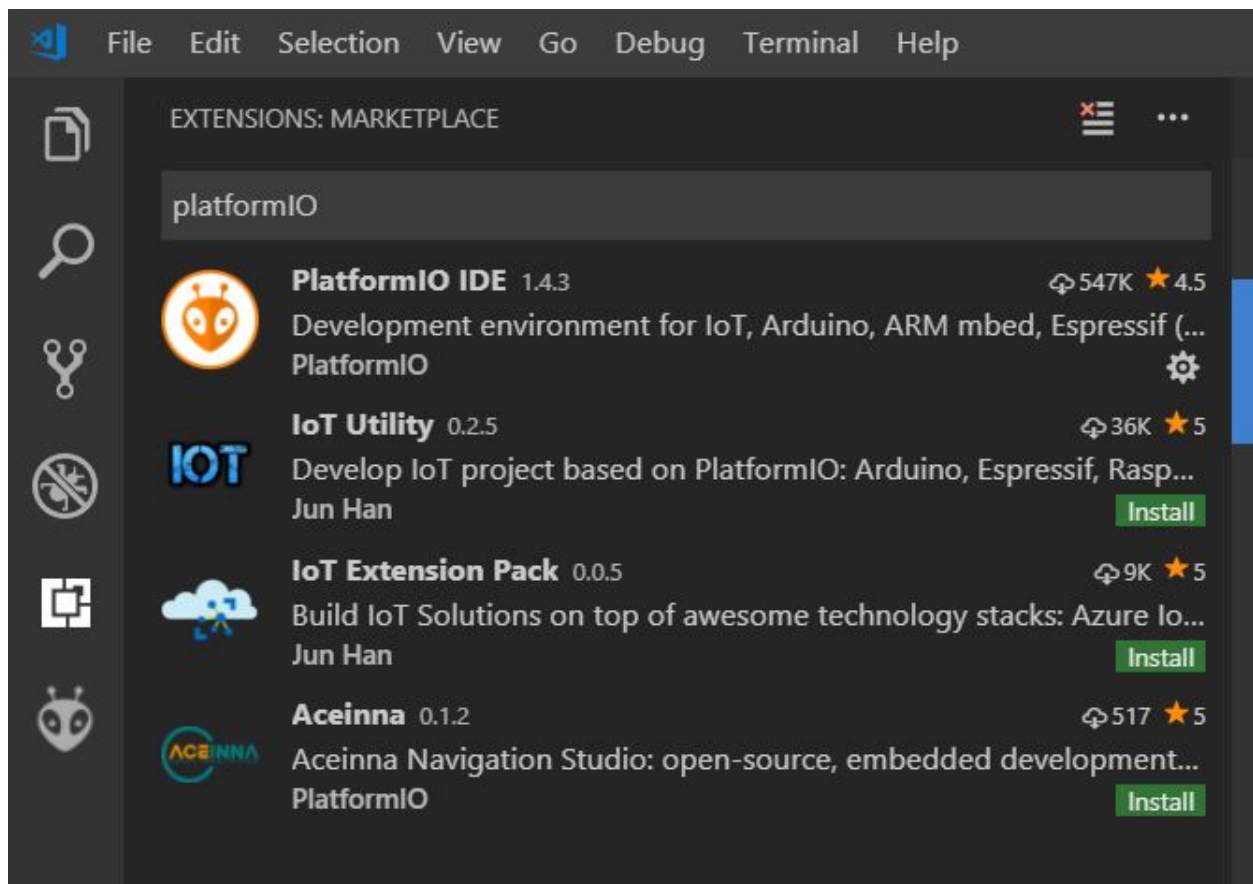

<https://code.visualstudio.com/download>

Download the appropriate version for your operating system

Once the download completes, open up Visual Studio Code and click the square looking icon on the left side bar:

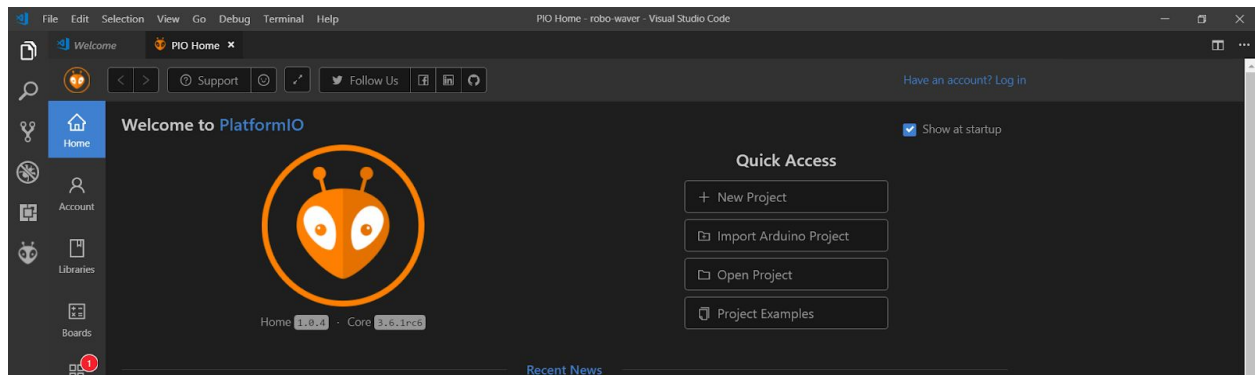

Search for PlatformIO:

Download the PlatformIO IDE.

Once the download is complete, there should be a pop up either at the top or bottom of the screen saying the download was successful. Once you see the pop up, hit the reload button.

Once reloaded, you will see a screen like this:

If you do not, hit the alien/ant icon on the left sidebar.

From here, you can start a new project, or open up the robo-wave project from Github:
